

A central shield-shaped badge with a blue border. Inside the shield, the text "Microsoft Learn" is at the top, "STUDENT AMBASSADOR" is on a dark blue banner in the middle, and a stylized person icon is at the bottom. The badge is surrounded by a dark grey cloud shape. Several glowing blue and purple lines with small dots at their ends radiate outwards from the badge, creating a sense of motion and connectivity.

# Microsoft Learn Student Ambassadors

## [Become a Student Ambassador](#)

Finding your community is more important than ever as classes and social activities take place virtually. Amplify your impact and bring together your peers to learn new skills, solve real-world problems, and build communities across the globe.

[Apply now >](#)

#### Benefits for All Student Ambassadors

- Microsoft 365
- Techsmith Snagit
- Techsmith Camtasia

#### Additional benefits for Alpha Student Ambassadors

- Visual Studio
- Azure credits
- MTC voucher
- LinkedIn Learning voucher
- Name.com voucher

#### Additional benefits for Beta Student Ambassadors

- Expense Reimbursement
- Swag Box
- Consideration for Student Ambassador Summit

#### Additional benefits for Gold Student Ambassadors

- Additional MTC voucher after successfully passing a Microsoft certification exam
- Consideration for special events and speaking engagements
- Opportunity for program leadership
- Participation in pilot activities
- Microsoft Most Valued Professional (MVP) mentorship
- Consideration for Microsoft Most Valued Professional (MVP) nomination

## GitHub Student Developer Pack

Get the best developer tools

There's no substitute for hands-on experience, but for most students, real-world tools can be cost prohibitive. That's why we created the Pack with some of our partners and friends, like:

Travis CI

HEROKU

DigitalOcean

[See what's in the Pack](#) →

## GitHub Campus Expert

Grow your leadership skills

Build the tech community at your school with training and support from GitHub.

Campus Experts learn public speaking, technical writing, community leadership, and software development skills that will help you improve your campus.

# Get your GitHub student benefits

Learn using real-world developer tools

**FREE**

GitHub Pro while you are a student

Valuable GitHub Student Developer Pack partner offers

GitHub Campus Expert training for qualified applicants

## To qualify for student benefits, you must:

- Be currently enrolled in a degree or diploma granting course of study such as a high school, secondary school, college, university, homeschool, or similar educational institution.
- Have a verifiable school-issued email address or upload documents that prove your current student status.
- Have a GitHub user account.
- Be at least 13 years old.

## Offer availability:

- All partner offers are subject to the partner company's terms and conditions and may not be available in all regions.

  - What it do?
  - How the deployment works?
  - What is the advantage of Streamlit?
  - How to install?
  - How to setup on your local machine
  - Hello World with Streamlit
  - Taking simple user inputs and reflecting on screen
  - Hosting on Streamlit Share
  - Applying for the Streamlit account
  - Graphs, Text Output types, Data Science features
  - How we can build a ML model with Streamlit?
  - How can we convert our previously coded python script to be Streamlit-ready?
  - How to setup your local machine to work optimizely?
  - Different projects you can work on
  - QnA session
- 
- A decorative graphic at the bottom of the slide consisting of two horizontal bars. The top bar is blue and has three small blue dots. The bottom bar is purple and has three small purple dots. The dots are positioned at approximately one-third, two-thirds, and three-quarters of the width of the bars.

# What is a Python WebApp ?

- Python-driven web applications use Python code to determine what actions to take and what content to show. Your code is run by the web server that hosts your website, which means that your users don't need to install anything. All they need to interact with your code is a Browser and an Internet connection.

Getting Python to run on a website can be complicated, but there are a number of different web frameworks that automatically take care of the details.

Streamlit

# What is Streamlit ? What it do ?

Streamlit is an open-source Python Framework that makes it easy to create and share beautiful, custom web apps for machine learning and data science ( but not just limited to it ).

It is fast, responsive and connects directly with your GitHub repository to provide one tap deployment service.

In just a few minutes you can build and deploy your own powerful web apps.

So let's get started !!

# How Deployment works ?

Before looking at How the Streamlit deployment works, let's first install Streamlit and do the required setup on our local machine to create and run our own very first web App.

We'll be covering this section along with the Hands-on demo when we'll be hosting our first web app on Streamlit Share.

# Installing Streamlit

Prerequisites –

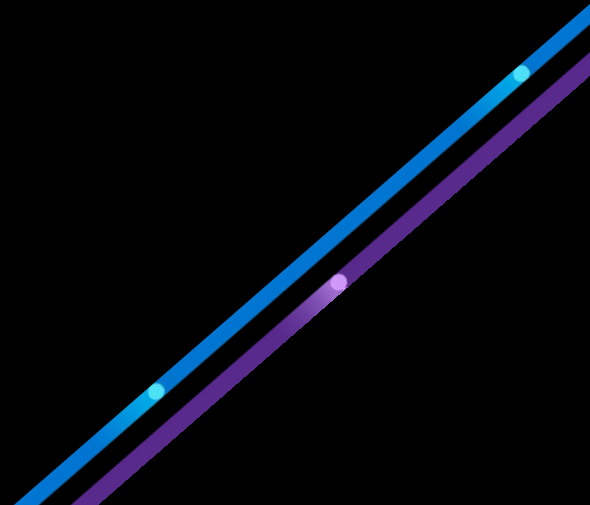

- VS Code ( or any Text Editor )
- Python 3.6 or higher
- PIP

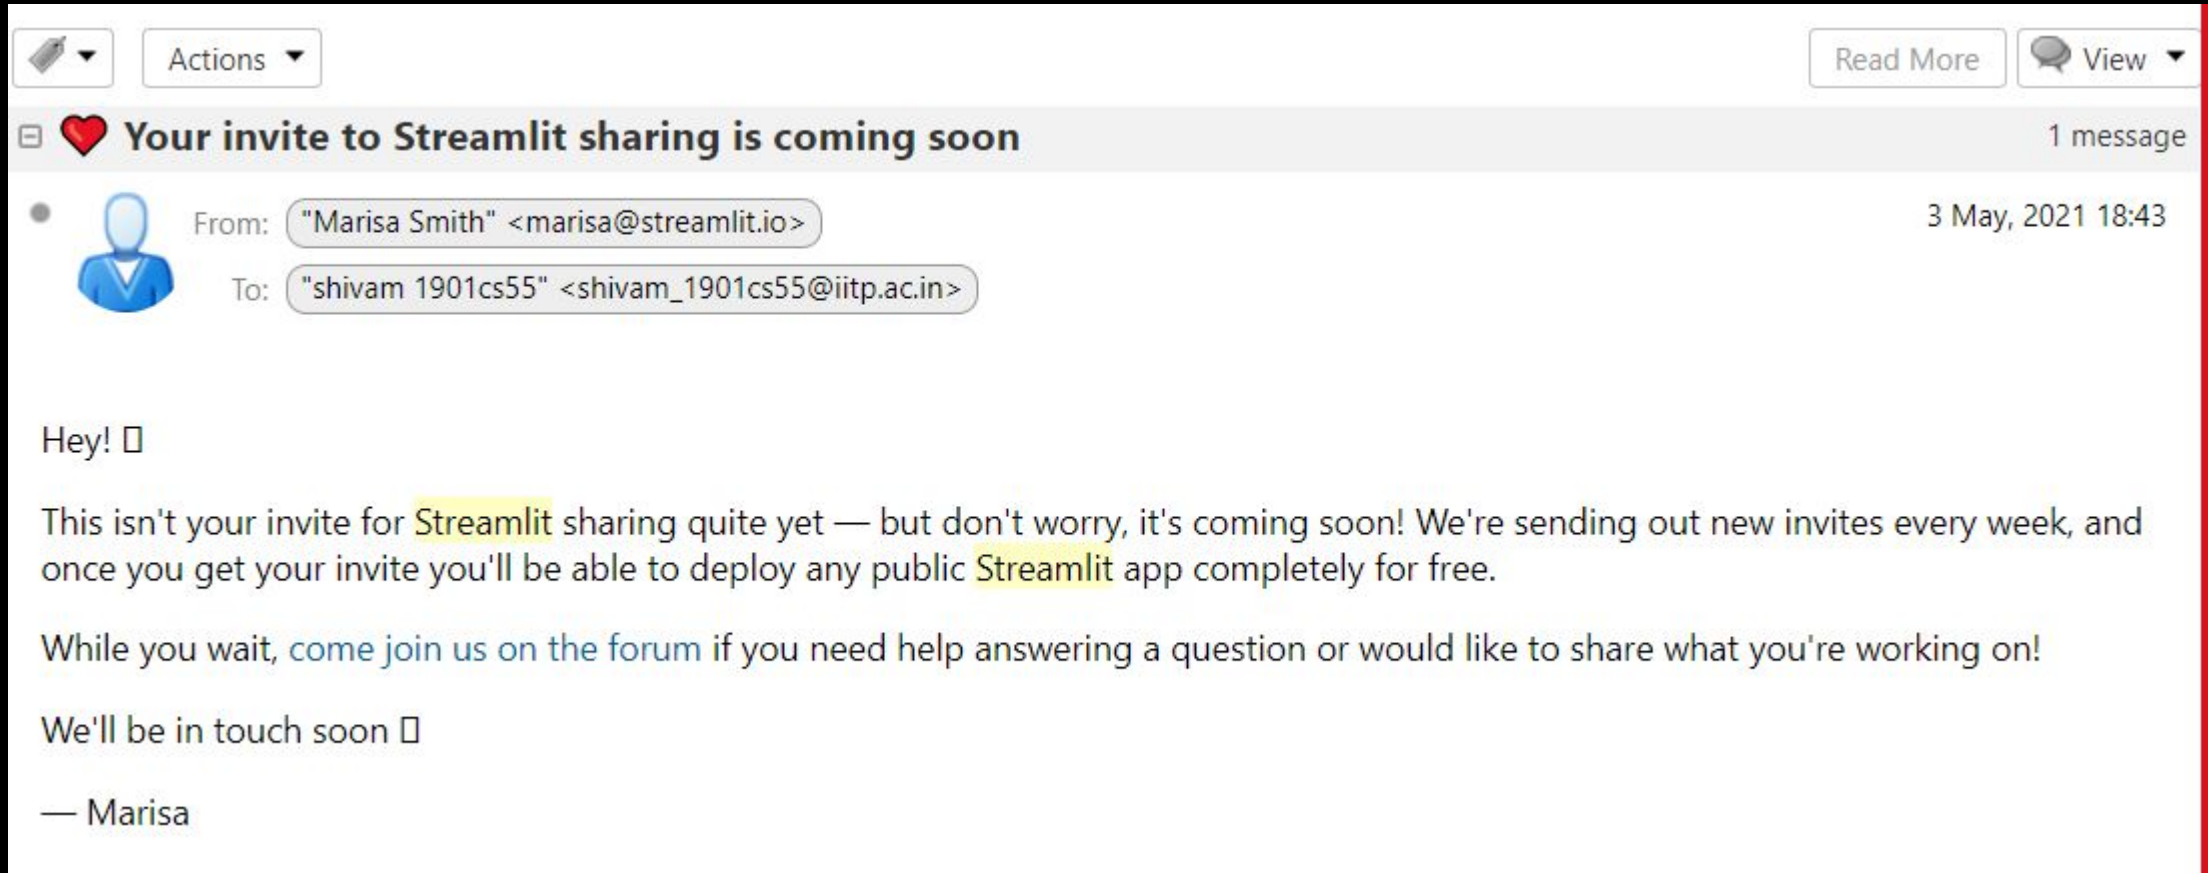

Run these commands in your environment to install Streamlit :

- `pip install streamlit`  
( This will install Streamlit and other required libraries on your PC )
- `streamlit hello`  
( Run the hello world app to make sure everything working fine )
- `pip install scikit-learn`  
( a very important library for ML models and functions )

# Hosting on Streamlit Share

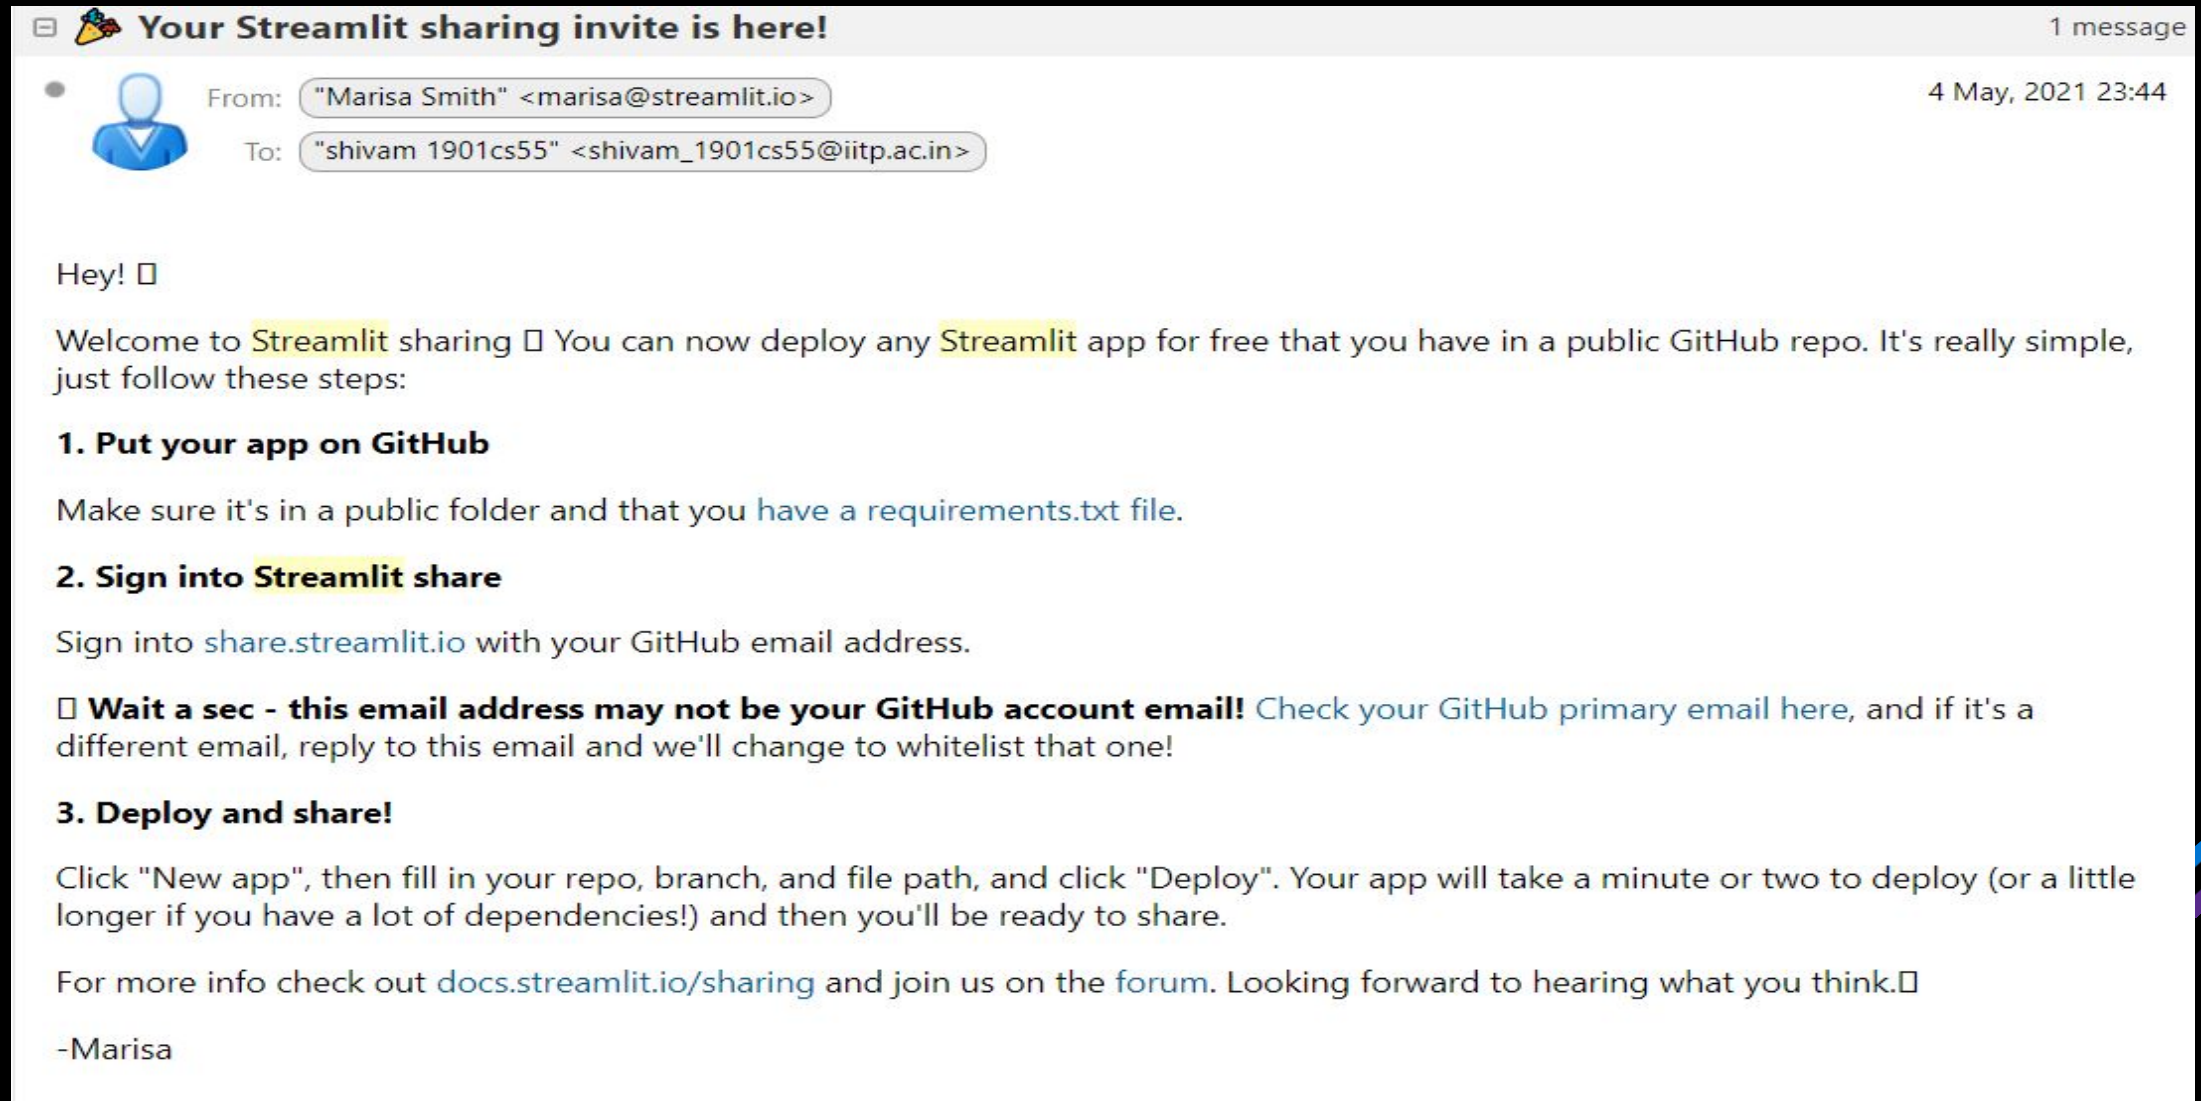

- Go to <https://streamlit.io/sharing-sign-up>
  - Sign up on the Streamlit Sharing invite form.
  - After signing-up, you will receive your Streamlit Share invite link on the registered email within few days.
  - Put your app on GitHub.
  - Sign into Streamlit Share account.
  - DEPLOY AND SHARE !!!!
- 

After signing-up on the Streamlit Share, you'll receive a mail like this.

Within 2-3 days after signing up, you'll receive your Streamlit Share Account link. You'll receive a mail similar to this one.
